

Introduction to MoTeC Software & Driver Coaching with Data

Location: VIR - at Krause & Associates LLC
1081 Ace Drive Suite #2
Alton VA 24520
(919) 740-1871 peter@peterkrause.net

Days: **June 8th, Monday**
- *Introduction to MoTeC Software*
June 9th, Tuesday
- *Driver Coaching with Data*

Time: 8:30am - 5:00pm

Cost: \$300 either day, \$600 both days

Signup: RSVP cb@cb-racing.com or visit www.squigglylines.com to sign up.

Day 1. Introduction to MoTeC Software

A full day of training that will teach you all the basics of using your MoTeC Logger. Covers the following:

- [Dash Manager](#) - logger setup software
- [i2 Standard](#) - data analysis software

How to & Best Practices are highlighted throughout the class. Each participant will receive a printed notebook of the class slides which are used throughout the day for taking notes. Topics covered in the class include

- downloading data
- managing data files
- adding & calibrating sensors
- setup GPS and lap timing
- logging setup
- display & alarm setup
- shift light setup
- i2 graphs and layout setup
- i2 hotkeys
- i2 track maps & section timing

→ Participants are required to bring their own laptops. Motec software only works with PC laptops.

Day 2. Driver Coaching with Data

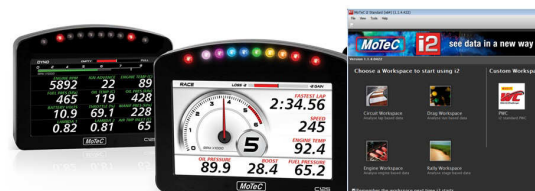

A full day training seminar discussing how to use data for driver coaching. This class will teach you how to read squiggly lines, understand them and figure out what they are saying. For drivers, driver coaches and engineers. Each participant will receive printed notebook of the class slides which are used throughout the day for taking notes.

Topics covered include:

- Speed analysis
- comparing drivers
- getting the most from ABS
- tire grip theory
- cornering theory
- oversteer / understeer from steering
- how to use theoretical fastest lap
- integrating video

→ Participants are NOT required to bring their own laptops
