

Auto Club – Morning Driver's Meeting Notes

General Information:

We will hold a morning Drivers Meeting and post-race impound. These notes supplement the in-person meetings. We will also hold a separate Driver's Meeting for PDS drivers. The Drivers Meeting will be held in the classroom in Garage number 2 (see map below). Instructors and coaches are allowed and will be assigned on an as-needed and by-request basis.

Everyone needs to complete the SpeedWaiver (<https://porscheownersclub.speedwaiver.com/fuov>) or use the QR code below), including those who are not driving (e.g. family members). You will show the SpeedWaiver when you pick up your wristband and window sticker at registration. Please have tech inspection **completed** before requesting your wristband and window sticker. Registration will be at Garage 59 (map below). Rental transponders will be available at registration.

It is hot at Auto Club so please remember to hydrate. We have water available at the pass-through near garage 41.

Tech Inspection will be handled by both Pro Motorsports and Vali Motorsports. Both are located in the paddock. The fee is \$20 payable to the POC.

Vali Motorsports is available for tire services.

Racers and Time Trial:

If you run in a different class (e.g. a car that can run in GT2 or GT3) please mark your car for the class that you are running in. We encourage drivers not to race cars that are not in their class.

For all cars running in GT classes, you will receive an email if you are missing your Appendix D. In addition, we will send out a link to a list of all the current Appendix D information for all participants. If you have made any changes to your car that affect your Appendix D (off track weight or dyno sheet) please get a new Appendix D submitted. Scales are available in the paddock in the pass-through near garage 41.

There is a dyno available on Saturday, so you have no excuse for a missing Appendix D. The dyno is typically located near the arch that provides entry to the paddock. The dyno is \$80 for three pulls (including air to fuel ratio).

Reminder - racers must have the following available: stamped vehicle logbook, Appendix D if running in a GT class and off-track weight labeled in their doorjamb.

Racers, if you are delinquent on medical forms please get those up to date. You should have received an email reminder. You may be excluded from an event if your medical is not up to date.

Boxster Spec drivers, please make your tires available for stamping. **Do not make the tire stamper unstack your wheels. Do not wait until 5 minutes before qualifying** and please coordinate with one of the Boxster Spec representatives (Karen Robinson).

Please remember that GT2, GT3 and GT4 cars may deploy only one set of new tires per weekend (per the GCRs).

We are posting session times and grid sheets in Race Hero. Racers need to know their grid position for the races and not rely on grid workers. There will be no paper time sheets or grid sheets available. If you are late to the grid, you will start DFL. The grid closes at 1 minute. You should be there no later than the 5-minute call. When you grid, please put your grid number in your left outside mirror. Of course, if you want to start DFL you can.

We will have split qualifying in both race groups. If you are in the slower half of the practice times, please qualify in the second split group. Please check the number of laps in each race and fuel accordingly.

Split starts are planned for GT1/GT2 and GT3/GT4 in Red. Orange group split starts will be announced at the Driver's meeting. followed by the BSRs and then GT5s and GT7s. Stay in line for starts and don't

jump the start. We will be watching for either violation and you can be black flagged for jumping the start or being too far out of line. No weaving or tire scrubbing once your group forms up.

We tend to have issues in turns 3 and 4 on the first lap. Please use some discretion and don't get added to the list of "I had bad judgement in Turn 3 club." No more than two cars can successfully go side-by-side through turns 3 and 4. We have video to prove this...

Please be on time to the grid. If you are late to the grid you will start DFL. The grid closes at 1 minute. You should be there no later than the 5-minute call. When you grid, please put your grid number in your left outside mirror.

Racers, please remember that blocking is not allowed. Per the GCRs.

*On a straightaway, the driver in the lead may proceed in a straight line at any position on the track but shall not attempt to block or impede the progress of passing car(s); weaving is not permitted. When approaching a corner, the car in the lead is permitted one defensive move but such a **move must not be reactionary or so late as to create a danger to the following car.** Such blocking behavior may result in a black flag penalty, regardless of whether there is contact.*

Drivers who repeatedly fail to leave racing room when being passed, or who repeatedly exhibit blocking behavior, will be penalized, regardless of whether contact is made. This may take the form of race disqualification, write-up, or a 13/13, at the discretion of the Competition Committee.

Under full course caution the overall race leader needs to slow to 55 mph. If you do not slow to 55 mph you will be black flagged, and we will see if the new leader can slow to 55 mph.

After the races, there will be a normal impound. Competition Committee members will let you know if you need to go to the scales.

You must report incidents of contact (report to a competition committee member when coming off track) and if you do not report it that means a 13/13. We will handle impound activities by reporting any incidents to a competition committee member. A competition committee member will tell you if you need to go to scales, or any other inspection, when you exit the track after a qualifying session or race. If you have questions contact our Competition Director: John Momeyer (661) 478-9561 or cd@porscheclub.com.

MAKE SURE YOUR FORWARD-FACING CAMERAS ARE WORKING RACERS!" If you have questions, contact our Competition Director: John Momeyer (661) 478-9561 or cd@porscheclub.com.

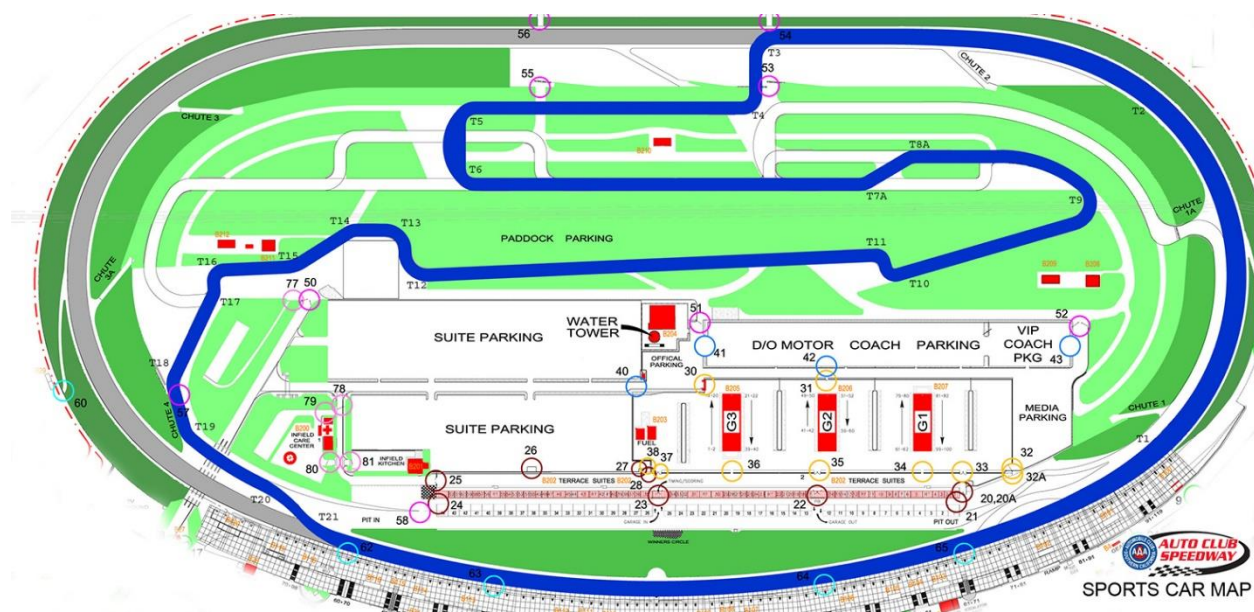

All Time Trial Drivers:

We plan to grid the Time Trial groups by time for all sessions after the first practice session.

PDS and Time Trial Point-By Drivers:

The PDS Driver's Meetings are mandatory . If you miss the PDS Drivers Meeting, expect to miss your next session.

PDS Time and Trial Point-By drivers, please remember to make a full point-by for each car passing. Please put your whole arm out the window, not just your finger. If you have a car consistently behind you, they are faster, and you should provide a point-by. Passing zones are the straight between turns 4 and 5, the straight between turns 6 and 7 (the start of the chicane) and back straight (under the bridge) between turns 11 and 12. PDS Time and Trial Point-By drivers **do not** need a point-by to pass on the main straight (prior to turn 1). Please stay low on the front straight unless you are passing and let faster cars pass on your right. A point-by is required in the infield section of the track.

Eben Benade will have PDS meetings per the schedule.

Safety Notes and Basic Reminders:

Speed in the paddock is 10 mph. Be very mindful of children, pets and people distracted by the cars.

You must report incidents of contact (report to a competition committee member when coming off track) and if you do not report it that means a 13/13. If you have questions contact our Competition Director: John Momeyer (661) 478-9561 or cd@porscheclub.com.

When entering the track from the hot pit lane or grid stay below the white line until the blend line (dashed line) after turn 2. Cars can be approaching at over 150 mph, so stay low until through turns 3 and 4. When exiting the track during a session, exit via the pit lane and re-enter the paddock through the break in the pit wall. At the end of a session you may exit at turn 9.

If you spin and go off never reenter a hot track without being directed by a corner worker or without having a clear view of the track. We have issued a 13/13 for not re-entering safely so do not let that be you. Please, when you spin whether on or off track get your feet on the pedals hard to keep from rolling backwards, perhaps in front of oncoming traffic. Remember If you can't see a worker and you can't safely position to see any oncoming traffic then you must stay put until the end of the session. A tow vehicle will be on its way.

If you see smoke from your car or suspect any issue based on your gauges or car behavior, get off the racing line and pull into a safe location off track. If we cover the track with fluids it takes time to clean and we will have a messed-up schedule.

If you need to stop off track for any reason (mechanical, post contact, etc.) tap the roof of your car to let the corner workers know that you are ok (assuming that you are ok).

Reminder to turn in your volunteer activities. No more Blue cards! Fill out the form at <http://www.porscheclub.com/spr> to get credit. Please fill out the form within 7 days of the race weekend to get your service points and POC bucks. Remember that you need service points to be eligible for a championship or any year end awards.

Results will be posted after the event on the POC results page (<https://results.porscheclub.com/>)

Please ensure that you are familiar with the flags and hand signals described in the GCRs.

Flags

All drivers must fully understand and adhere to the following flags:

Green: The Green Flag means go; course is open and clear.

Yellow: NO PASSING. Stationary Yellow Flag means reduce speed enough to respond to unusual hazard(s). NO PASSING.

Waving Yellow Flag: NO PASSING. This means the course may be blocked ahead, be prepared to stop, however, do not stop unless necessary and always be aware of vehicles close around you. NO PASSING. The prohibition on passing starts at the line on the racetrack perpendicular to the point of the first displayed yellow flag(s); The pass must be completed by this point. However, in cases where the incident is clearly visible as being in close proximity to the yellow flag(s), such that passing on approach to the yellow flag(s) would put someone in danger, passing on approach to the yellow flag(s) will be considered dangerous/reckless driving and will incur a one lap penalty or possible 13/13, at the discretion of the Competition Committee.

Once past the yellow flag(s) a pass may not be INITIATED until you are completely past the incident(s) and you have a clear view of an incident-free track between you and the next manned flag station, and it is clear that that flag station is not displaying a yellow flag. Timing a pass such that it occurs at or immediately after an incident and therefore requires accelerating adjacent to the incident will be

considered dangerous/reckless driving and will incur a one lap penalty or possible 13/13, at the discretion of the Competition Committee.

Double Yellow - NO PASSING. Reduce speed enough to respond to hazard(s) on the course. The overall leader of the race will slow to 55 MPH or less and collect the entire field. There will no split starts after a double yellow and all cars should collect together in a single file line. Racing will only resume with a green flag at the start/finish line. If the leader of the race does not slow to 55 MPH, they will be black flagged, and the next car will take over the leader's responsibility of collecting the field.

Red: Red Flag indicates an emergency situation. Look in mirror(s), pull safely to trackside and stop in view of nearest corner worker. **Remain stopped until instructed otherwise.** You will resume under a full course Black flag condition.

Blue with Yellow Diagonal Stripe: This is the "Passing Flag" warning of potentially faster cars behind you. Look in mirror(s) and allow faster car(s) to safely pass in designated areas.

Red with Yellow Stripes: This flag warns of debris, slippery fluids and/or any changing track conditions requiring caution and reduced speed.

Black with Orange Dot: Your vehicle reportedly has a mechanical problem. Using the designated track exit, proceed to the Black Flag Station with extreme caution. If your car is dropping fluid, drive off of the track surface.

Black: You have been identified as having made an infraction. If the Black flag is furled, then the driver must discontinue his present driving or face an open Black Flag. An open Black Flag signals that the driver must proceed immediately to the pits via the designated course exit and report to the Black Flag Station. Full course Black Flags signifies that all drivers are to discontinue racing (no passing), slow down and proceed single file using the designated track exit to the Black Flag Station. Any racer who ignores a Black Flag during a race shall be assessed a one-minute penalty for each Black Flag passed. During a race, any driver passing under Black Flag All will be assessed a stop and go penalty under green flag conditions. If the infraction occurs on the last lap or two and it is not possible to assess the stop and go penalty or video evidence of the infraction is provided after the race, the racer shall be penalized one lap.

White: The White Flag warns of a service vehicle on course. Proceed with caution. You may not pass a service vehicle unless instructed to do so. The White Flag may be displayed at the Starter stand as an indication of the last lap before the Checkered Flag.

Checkered: The Checkered Flag announces you have completed your final lap. Proceed to the pits using the designated track exit.

Passing Under Yellow/Double Yellow: Any driver in a non-race event who passes under a Yellow Flag condition and does not give the position(s) back to the car(s) passed, will be black flagged and removed from the track for the remainder of that session. During a race, any driver who passes under yellow and does not give the position(s) back to the car(s) passed safely will be black flagged and assessed a stop

and go penalty. If the infraction occurs on the last lap or two and it is not possible to assess the stop and go penalty or video evidence of the infraction is provided after the race, the racer shall be penalized one lap.
