

South Jersey Region SCCA

Endurance Class Concept and Examples

Cars from all eligible classes, including cars with log books from other sanctioning bodies meeting basic SCCA GCR safety requirements, will be grouped into five Endurance Classes (E1 thru E5), SRF, and Prototype for SJR SCCA Endurance events. Examples are below. The list is not comprehensive and is drawn on performance benchmarks across sanctioning bodies from 2018. We welcome inquiries from interested competitors and classes will be added or modified appropriately within this structure. Email atspeed@sjr-scca.org to be contacted about additions or modifications. While all cars are assigned to an Endurance Class, they must conform to their underlying sprint class.
