

TECH NOTES

Welcome to the 2023 Majors event at Homestead Miami Speedway. Below are a few notes to help everything move smoothly.

Drivers Restraint system 9.3.18.E

The Tech department would like to remind competitors to check their safety belt expiration dates. Belts may expire in December regardless of the annual inspection date. If you are unsure of the belt markings, check the date listed on your latest annual inspection in your vehicle logbook.

Battery disconnect location 9.3.34

Tech has noticed that some cars have placed the master disconnect switch near the center of the driver's cabin. This location is not easily accessible from outside the car, this makes it difficult for workers to reach in an emergency. Tech will be warning competitors and noting logbooks of improperly located switches for future enforcement.

Please note that a second switch can be placed within driver's reach if preferred as long as one is placed in the required location.

Let's have a great race weekend!!

Timothy Lee, Chief Scrutineer.
