

PUT IN BAY ROAD RACE HERITAGE SOCIETY
PUT IN BAY SPORTS CAR RACES SEPTEMBER 21-24, 2021
COVID 19 PRECAUTIONS
SEPTEMBER 3, 2021

With our Put In Bay Sports Car Races on September 21-24th quickly approaching and COVID-19 still an issue dominating the world we are proposing to institute some measures to help protect not only our participants and volunteers but the Island in general. At this writing no one knows what additional requirements, if any, may be instituted by Federal, State or Local authorities but these are things that we are planning to institute for our event.

We request that all participants and volunteers bring their CDC proof of vaccination cards for verification when completing our registration process. As in past years, all registered participants are required to sign waivers and wear supplied armbands as part of our insurance policy. Those who are vaccinated will be given an additional GREEN wristband allowing maskless participation in any indoor or close contact activities. Those not vaccinated will be asked to wear a proper mask during indoor and close contact activities.

If any of the island business who are hosting our social events decides to institute additional measures we of course will defer to their wishes.

Spectators not actively involved in participation or working the actual event will of course be subject to those Federal, State and Local regulations in place at the time of the event and beyond our control.

These measures were decided upon by the Put In Bay Sports Car Races organizers as a result of working at and participating in other vintage auto events throughout the United States over this summer racing season. We take our event and the responsibilities for the safety and health of our participants, volunteers and our island hosts very seriously. We welcome any comments or suggestions in response to our proposed COVID-19 precautions.

Best regards,

Put In Bay Road Race Heritage Society
